

REVOLUTIONIZE RETURNS[®] ↑↑

IN 5 EASY STEPS

Over 1/3 of today's ecommerce orders originate from a mobile device. **Customers who buy on a mobile device want to return on a mobile device.** Agile Network's **EcoReturn[®]** is an additive, breakthrough mobile technology for shipping returns that supplements existing return processes, including UPS, FedEx, USPS, DHL and many others. Here's how it works...

1

ADDITIVE

A patented 'EcoCode' is printed on shipping label or packing slip. A return URL is also provided in the order confirmation.

2

SCAN

Consumers scan the 'EcoCode' or click the return URL to view the e-packing slip displaying all purchased items.

3

SELECT

Consumers select the items and reasons for the return. Merchant is **immediately** informed of returning inventory!

4

CHOICE

Merchant preferred carrier return services are displayed. Consumer selects their preferred carrier service.

5

RETURN

Consumer affixes emailed return label and schedules pick up (premium service), leaves with mail or gets directions to preferred carrier drop off location.

PROFIT FROM RETURNS!

Delight your customers and learn more about them through Agile Network's EcoReturn® ...

(Scan code for demo)

PATENTED QR CODE TECHNOLOGY

Capture real-time customer data

CUSTOMER ANALYTICS

Facts, figures and statistics to improve customer satisfaction

BUSINESS INTELLIGENCE

Get information never before available to find new customers, keep existing ones and grow your business

IT'S ADDITIVE

EcoReturn® works with existing returns processes while accommodating the mobile shopper

M-COMMERCE TRENDS

Mobile purchasing is growing fast and will more than double in the next four years and that means more returns.

Be prepared. **Customers who buy on a mobile device want to return on a mobile device!**
