

FOR IMMEDIATE RELEASE

JDA DIRECT COMMERCE ANNOUNCES PARTNERSHIP TO PROVIDE ADVANCED GLOBAL SHIPPING CAPABILITIES WITH AGILE NETWORK TME (TRANSPORTATION MANAGEMENT EXECUTION)

CHESTERFIELD, MO, November 10, 2016 – Agile Network, a leading provider of multi-carrier and multi-modal transportation execution technology in North America, has partnered with JDA Software to provide JDA Direct Commerce clients with advanced global shipping capabilities.

Agile Network TME (Transportation Management Execution) is a software that optimizes carrier selection and service levels with certified integrations to FedEx, UPS, the USPS and hundreds of other carriers. The partnership offers JDA Direct Commerce clients with an integrated execution capability that addresses critical carrier compliance requirements that clients will be challenged with in 2017 and beyond. Agile Network TME supports multi-modal rating and routing, offering enterprise clients a streamlined process for carrier compliant shipping with the integration having obtained UPS Ready Compliance, [FedEx Diamond Compatible](#), and USPS IMPB Compliance awards.

The Agile Network and JDA Software partnership benefits clients shipping globally with full support and professional services available for the install and configuration of the TME software system implementation for JDA Direct Commerce.

Learn more about the JDA Direct Commerce partnership on Agile Network's website; [Agile Network TME for JDA Direct Commerce](#).

About TME

Agile Network's Transportation Management & Execution platform, [TME](#), is multi-carrier shipping software that provides users with certified support to a global carrier network, including: [FedEx](#), TNT, [UPS](#), [DHL](#), [USPS](#), [Purolator](#), [Canpar](#), Canada Post, DPD, Chronopost, DB Schenker, NACEX, DACHSER, GLS, Royal Mail, UK Mail, Singapore Post and [hundreds of regional operators](#). The solution also provides a full-featured, on-premise or cloud-based shipping and transportation management platform with real-time rating and routing, pack verification, consolidation, automatic ACE filing, export document generation, and integrated carrier invoice reconciliation and [audit](#). Agile Network TME may be configured to operate in both attended station and 'black box' modes with full support for high volume material handling, automatic weighing, and print-and-apply systems.
